

19-AMRITSAR SOUTH — DETAILED 169-BOOTH MASTERPLAN

Booth-level field operations strategy based on 2022 Assembly vs 2024 Parliamentary Dataset (Amritsar PC)

Purpose & Operational Framework

This document provides actionable field directives for all 169 polling stations of 19-Amritsar South. Every booth is assigned a concrete operational action sequence focused on urban cadre mobilization, merchant/trader engagement, ward civic grievance redressal, voter turnout revival, and repeat round visits.

90-Day Booth Engagement Cycle

- Days 1–30: Assign booth coordinators, assemble local mohalla committees, attach historical polling telemetry, and map geographic urban clusters.
- Days 31–45: Round 1 field visits — systematic community listening, record civic grievances (sanitation, water, roads, electricity), and verify voter list changes.
- Days 46–60: Follow-up — submit recorded civic grievances to municipal corporation and state departments, track progress systematically.
- Days 61–75: Round 2 field visits — return to booth, report progress on issues, engage local trader associations, and consolidate neighborhood leadership.
- Days 76–85: Remedial interventions — resolve inactive booth committees and address unaddressed local complaints in vulnerable wards.
- Days 86–90: Audit & Readiness — complete coverage verification, finalize voter mobilization rosters for 2027.
